

Bowers' Addition To Davis

\$250 LOTS 50 FEET BY 112½ FEET **\$250**

Cement sidewalks, curbs, rocked streets and ornamental trees all free.

All lots with fifteen foot alleys and facing an eighty foot improved street.

TERMS WITHIN REACH OF ALL

Building restrictions and alien clause as inserted in deeds and contracts issued on lots in Bowers Addition:

That up to and before the first day of January, 1930, any dwelling house or portion thereof, excepting front steps, shall be built and maintained at a distance of twenty feet from the property line in front of said property, and if said property is a corner lot no barn or outhouse of any sort or any part thereof shall be built or maintained at a distance of less than 15 feet from the property line on the side street; that all buildings requiring a sanitary outlet erected on said property shall be connected with the sewer or cesspool immediately after such building shall be constructed; that no dwelling house shall, when built on said lot, be of less value than \$1500. A building used for business purposes can be built on front property line provided front part is used for business purposes. No barn or outhouse shall be built at a distance of less than 80 feet from the front property line of the said property. And, further, that purchaser, heirs, executors, assigns, or agents, will not lease or assign, or any way transfer the said property to any one of African or Mongolian extraction, and that no one of said extraction shall be allowed to live on said property except as servants of residents thereof.

The first of six differently themed ads for the Addition. This one simply announces the development.

BIG YOLO COUNTY "GET TOGETHER" MEET AT WOODLAND

Yoloites Gather From All Parts of County For Banquet and Speech Making.

The "Get Together" meeting that was held at Woodland Wednesday evening under the auspices of the Yolo County Board of Trade, it is safe to say was one of the most memorable and important affairs that has ever been witnessed in this county and there is very reason to conclude that it will also be a history making event. As was apparently intended by the promoters, it was inaugurated for the purpose of marking a new mile stone in the progress and development of the resources of the county. The awakening, as it were, a county-wide spirit of enterprise and neighborly feeling.

As above indicated, "Get Together" was the colors and insignia under which the assemblage gathered, and it was the slogan emphasized all the way down the line. The very air seemed permeated with the aroma, more delightful than 'Otter of Roses, almost to the point of ecstasy, and superbly contagious; sitting enthroned, fully dictatory of the sentiments felt and expressed by the speakers and the audience alike.

The gathering was cared for in the Odd Fellow building, Oaks Club rooms on the second floor serving as a reception room, with the third floor sufficing as banquet and auditorium. The quarters, while quite commodious, were well packed, covers being laid for 250 guests.

It was, and no doubt with much of the semblance of credulity attached, declared frankly, that many prominent men of Yolo County who had never before enjoyed the felicity of a "Get Together", were there and so delighted and interested that if they were not transformed into boosters their countenances failed to distinguish them and a "Stay Together" club was immediately ushered into existence, emphasizing the new, optimistic view of life by the adoption of a "New Symphony of Yolo County" and which embodies the strong concoction, undiluted, of the real boost extract. "Live Wires" and "Boosters" literally thronged and predominated every feature of the occasion.

The program was ushered in with the seating of the guests at the festal board after Rev. W. E. Bobbitt delivered an invocation.

Woodland Rebekah lodge prepared the banquet. It was not of the "Goose Stew" type, but was real roast turkey to a turn, as juicy and tender as the culinary art could make it, and in ample abundance, accompanied with hot rolls, and plenteous of other good things to follow. Too much eulogism could not be extended the ladies for the part so well executed.

Following the feast of good things H. H. Gable, President of

Toastmaster McConnell, extended at some length upon the purposes of the meet among other things declaring the people of Yolo had too long been going it alone, tandem fashion. The knocker must be relegated to the "has beens" and the hammer to the scrap pile. We have been content to remain hidden but the world is finding us out. He read telegrams from Senator Boynton, Congressman Curry and S. W. Russell, expressing regrets because of their inability to be present.

The first speaker introduced was Supervisor Stitt, chairman of the board who gave a brief review of the position and desires of the board and pledging their best efforts and support in behalf of public advancement.

Assemblyman Murray, whose subject was announced as "My Legislative experiences", declared he had not been as yet ingratiated in to the mysteries sufficiently to expound them. He favored strongly the road from Rumsey to Lower Lake and believed the bill would pass. And will introduce a bill regulating the sale of San Quentin bags, concluding by introducing Senator Shannahan.

Mr. Shannahan related reminiscences of his boyhood days in Yolo County and his love for her. He declared conditions legislative have greatly changed since his advent on the sence in 1897, since which time he has served continuously. Both policies and conduct of men is now much better; concluding his

JUBILEE QUARTET NEXT TUESDAY

The California All Star Jubilee Quartet will give one of its popular secular concerts at Silva Hall Tuesday, Feb. 4th. The quartet is composed of four versatile performers. They come advertised as having four soloists, three pianists, two impersonators, one reader and no-drones. Quartet selections, the

trios, the duets, the solos, the impersonations and the readings make

SUBDIVISION WORK IS PROGRESSING

Coming Week Will See Work At Full Blast.

The past six days have witnessed a remarkable transformation scene so far as the "Bowers Addition" is concerned. With the arrival of 100 tons of crushed rock and sand, contractor Vance has started the laying of the cement walks about the addition and by the end of the coming week the walks will be well under way.

Contractor Smith announces that he will begin grading the streets immediately. He planned to start during the early part of this week but the ground was too soft to permit the traction engine to move over it. The coming week, however, will see the streets graded and the dirt thrown to the center so it can be hauled away.

William Jensen has been awarded the contract for the laying of the curbing and this work begins on Monday, to be continued until it is finished. The holes for the trees have been dug and an order placed for 300 Black Accacias, to be shipped in the pots so that there will be no danger of loss in transplanting.

Mr. Pedder is considering the planting of Monterey pines in front of each home, which if carried out would give two pines and two Accacias as shade trees.

The addition still continues to occupy the center stage so far as investments are concerned as is evidenced by the many sales of the past week. Many of those who have purchased have announced that they will erect homes and this is a big boost for the newest addition to Davis. During the week all of the fences on Fifth street have been taken down and John Coonrod commenced moving the wagon and other parts of vehicles from his place on Cherry street.

By arrangement with Supervisor Russell, Mr. Pedder will grade all of the streets north from 4th to the subdivision. This will remove all the fences in the path of the traction engine and make the town continue out to Sixth street, which is the farther border of the subdivision.

PARCELS POST IS POPULAR

Parcels Post has become quite popular at the local office. Miss Sherrill tells us that during the month closed yesterday, there were about 370 that came in and 266 out with 150 in transit. Practically all manner of 4th class matter goes through. The three first to utilize the new system were; Davis Hardware, Schmeiser Manufacturing Co. and Davis Garage. Everything goes from the smallest articles to parts of engines and automobiles. In some instances the charges are from one third to one half of the cost by express. Hence everyone with a parcel to ship, gets busy now and investigates the cost before

will not soon be forgotten, for the hospitality extended.
 While at the State Farm, a sentiment developed among the Legislators, that they very much desired to see more of the State institution and the proposition was suggested by them, that they be given an opportunity to again visit the Farm when more time would be at their disposal, and there is a possibility that such an event will be arranged for some time during the month of April and before the Legislature adjourns.
 It is due to call attention to the fact that the Yolo County Board of Trade is entitled to great credit for the success of the big parade of the States law makers, over the county. Also the Board was ably and loyally assisted by a large staff of indefatigable workers, beginning with Senator Boynton, Assemblyman Murray, the editors of the Woodland

and 100 more of their wives, sweethearts and officials, etc., then it was that we hollowed for help and your people responded so splendidly. Had it not been for Davis, Winters, Knights Landing, and other nearby neighbors, we could not have handled the people who were guests. There were 249 guests on the special train from Sacramento, and a few others who came in on regular trains.
 And averaging the guests at 3 per car, although the average may have been a fraction less than three to each auto made no less than 100 cars necessary, and there were 2 or 3 more than enough, I think.
 And that lunch that was served at the University Farm. Such coffee, sandwiches and ice cream. It was a fitting finale of a most successful day. I think it was the best and most far reaching one days advertisement that I was ever connected with.
 "It leaveth the whole lump"—Good will come from it in many ways for a long time to come.
 Now, I do hope Davis will not go amiss on incorporation.
 Keep that "ball a rollin'". It means bigger and better things for you.
 H. S. Maddox,
 (Secretary County Board of Trade.)
 Many inquiries have been received for information as to grafting and budding. To meet these requests the University Farm School, Davis, will give three days special work in grafting and budding, March 25-27, inclusive. There will be one lecture in the morning and in the afternoon each day, on principles and methods, followed by three hours of practice in the nursery and orchard follows.

Meeting Enthusiastic For Town Incorporation

Silva hall was comfortably filled Wednesday evening by citizens of the town, gathered for the purpose announced, of discussing incorporation. Quite a number of ladies were present. Good feeling seemed to pervade the assemblage generally. If the enthusiasm expressed in favor of incorporation Wednesday evening is criterion, the success of the proposed new era is practically assured. Before adjournment, had a roll been called, it is doubtful if a dozen votes in opposition could have been mustered.

D. R. Throop called the meeting to order and announced the purposes, the first on the program, report of committees appointed the week previous.

First on investigation; Messrs. Harby and Schmeiser and Jakie Grieve. Mr. Schmeiser by way of report, read a number of replies from other small towns to whom he had addressed a letter of inquiry as to population at time of incorporation and at present; time of and cost of water system; amount of bonded indebtedness, water rates, tax rates and as to whether incorporation was satisfactory or not, etc., The replies were all favorable, reporting taxes not excessive, and none of them would consider disincorporation. Several of them extended in the many improvement. Mr. Schmeiser had also obtained some data from the county assessor's books, including the number of tax payers which were given as 210; the assessed valuation of the property included in the old town limits \$299,565.05.

Jakie Grieve gave a supplementary report, including a trip to Winters which said committee made, that they found the people enthusiastic over their town, a good water system paid for, good fire protection with insurance cut in half and even the soreness from the old saloon fight had now vanished and the people are just now rejoicing over the fact that their new sewer system is now in operation, all filled with civic pride and inclined to pull together.

Pat Brady another member of said committee, had been unable to see anything in the way of improvement in Winters.

The report of committee above referred to as received and ordered placed on file. At the beginning we failed to state that Mrs. Jennie D. Read was chosen secretary of the meeting.

The chairman at this stage of the proceedings announced the presence of some gentlemen from nearby towns and could probably give just such information as was desired at this time, and called upon Mr. Lehe of Dixon.

Mr. Lehe said he still feels that he is almost a Davis citizen, owing to long association in business. He complimented Davis residents and their good citizenship, declaring he had less trouble here than in any other town he did business with. Said he, "I want to pay a tribute to your newspaper man, who is a good one and a credit to your city." He hoped Davis would incorporate and gave many substantial reasons, that he did not know of a town in California the size of Davis that was not incorporated. In addition he gave much interesting data relative to civic matters and was heartily applauded.

proval followed his remarks and the chairman called upon W.J. Weyand of Dixon.

Mr. Weyand made a good talk, assuring Davis of the good feeling in which she is held by Dixon, and gave many substantial reasons why Davis should take the incorporation step, concluding with the announcement of Dixon May Day celebration which is to be better than ever before.

Mr. Green, banker of Concord, was the next speaker. He also is gifted with the ability for making a good talk to the point. He called attention to the fact that Ireland has been fighting for ages for just what Davis is now asking, home government. He explained what incorporation had done for Concord and what it could do here. Concord's tax rate is \$1.75, the population has doubled and the people are well satisfied.

F. P. Smith, made a strong point when he stated that his expenses for night watch and sprinkling alone were more than the taxes on a good home. He was glad to hear men other towns talk and hoped the people of Davis would get together.

W. H. Morrison a strong talk in behalf of incorporation, and municipal water system and gave statistics from several towns, also quoting data from meetings held during the previous campaign for incorporation.

Mrs. Jennie D. Read explained previous indecision about the matter of incorporation why she is now convinced that it is the best thing to do and that with the good workers we have, believed we could do anything we undertake.

J. C. Luft, "I have nothing to say, I am for incorporation."

F. W. Wilson opposed to incorporation because he thought the town could never go through the ordeal. He dwelled at length up on the need of street work, the condition that the streets had been left in, etc. The chairman declared that while the speaker was avowedly in opposition, it had proven one of the strongest speeches of the evening in favor of incorporation.

Chairman Throop declared the meeting owing outside gentlemen who had spoken a vote of thanks and was greeted with applause.

A motion was unanimously carried authorizing the chair to appoint a committee of three on the matter of circulating a petition for incorporation to be presented to the board of supervisors, said committee vested with full power to act. J. B. Anderson, C. W. Bowers and I. G. Schmeiser were appointed. Likewise committee on boundary; Jakie Grieve, S. W. Lillard and S.H. Beckett. On publication; F. P. Smith, Jennie D. Read and W. H. Scott.

Meeting adjourned.

Baseball Game Today

The State Farm boys will cross bats with the Marysville high school nine on the Farm diamond this (Saturday) afternoon. This will be the fourth game for the Farm boys and a good game can be looked for as they have defeated two of the best teams of the northern part of the state—Sacramento High and Oakland High—so they can play ball.

Friday, March 21, is X-Cross Bun

SUB-DIVISION ATTRACTIVE PLACE

Definite arrangements for the setting out of a string of quick growing eucalyptus trees on the north side of Sixth street, completion of the laying of the 8,000 feet of curbing; setting out of the black acacia shade trees; the commencement of the laying of 2,000 final feet of cement sidewalk along the south side of Sixth and the east side of Ash streets, preliminary plans for the sinking of a well and tank to supply water to the addition and the absolute assurance of several lot buyers that they will erect homes in the immediate future completes the list of developments so far as the Bowers addition is concerned.

The eucalyptus trees will be planted at a distance of every ten feet and will be put out in a few days as they have already been ordered.

Contractor Jensen put the last spike in the curbing on Friday thus completing this difficult task.

The ornamental trees are now out and have been given a thorough wetting and have been mulched with straw manure to hold the moisture insuring a good start. Mr. Pedder assures us they will be well cared for during the next twelve months thus giving them every opportunity to take hold.

Tuesday saw the work of laying the sidewalk forms along Sixth street completed and immediately the work of putting in the walk

A. W. HEEN, of Hawaii. Member University Glee Club scheduled for Davis, Saturday evening, March 15.

commenced. The walk is expected to be clear around the addition by Tuesday and then after a short delay for more material the intersecting streets will be fixed.

The question of water, which has been a big factor with those desiring to build has been taken up by the company and Rowe & Wire are now figuring on what it would cost to install a well and erect a tank so that the entire addition can be supplied. The plans call for a well, tank and automatic pump which will start pumping whenever the water is used.

Every day the question is asked as to when a building will be started. There are several figuring on building, some of them being: W. W. Bulkley, J. H. Krider, Otto Baumann, W. H. Morrison, W. H. Young and Mr. Wm. Jensen. Mr. Bulkley who recently returned to

Editor Scott keeps us abreast of progress in the Addition.
Of related interest, civic interest in incorporation is growing, as described in the story to the left.

and mothers to forget that the hour of eight was the one for their young ones to be fondly tucked away in their beds.

To the same old residents the fact is apparent that our club dances are not what they used to be. That is in quantity. In quality they have been improving and for the reason that for such improvement it has taken more money per dance, the number of our dances have greatly diminished.

In order that we may have a greater number of dances and in order that the old dance bear will not hibernate too soon, the Dance Club this year is trying to raise enough money by giving the masquerade Ball, with this in view.

The prizes this year have been donated. We have the following named concerns and persons to thank for them: Davis Hardware, G.B. Hoag, Anderson & Rogeri, L.J. Henning, Davis Lumber Co., Bowers Addition, Davis Pool room, W. Alter, T. G. Schmeiser and Cecil & Pike.

Come all on March 13. Admission—Gentlemen maskers \$1.00, Spectators, 25 cents, Supper, 50 cents.

Remember that the masquerade will afford the same old good time as it always has afforded.

A Club Member.

PRAISE FOR THE DAVIS ENTERPRISE

I cannot refrain from writing a few lines in the interest of our town paper hoping that those who may read it will help to boost the best small town paper in the whole great State of California.

Fellow citizens do you ever think what our town paper is doing for us? It takes notice of all the new enterprises started and does a great deal of boosting gratuitously. Why not appreciate it by putting an ad if only a small one in the next issue, thereby helping the Editor financially and bringing returns to you from some unexpected source. No business can exist on praise alone, so now all at once, come forward and help, financially, to keep the wheels going round that turns out the paper that works for your interest. A Citizen and Well Wisher.

erect a seven room bungalow.

The plans were given to Mr. Bowman early this week with a request that he give an estimate as soon as possible. Mr. Bulkley states he will erect his home as soon as he can complete the preliminary matters.

Mr. Krider has stated that he will build a home as soon as the water question is definitely settled. Mr. Bowman, Mr. Young, Mr. Morrison and Mr. Jensen are also studying plans for a home. The

Our methods in treating teeth are positively painless.

BOWERS PUTS ON NEW ADDITION

Subdivides Tract North of Town Into Acre Building Lots.

C. W. Bowers, the gentleman who sells big horses and who sold 108 head during the past year and a greater number of that class of horses than any other firm in the United States, has proven a valuable acquisition to citizenship of Davis. He is not only wide awake and enterprising, but always ready and willing to get behind anything that promises improvement and civic betterment.

Last winter his enterprise resulted in the successful launching of the Bowers Subdivision, town lots and which A. R. Pedder, through a deal with Mr. Bowers and with his co-operation carried successfully and which will mean a great deal in the end toward development of the town. The lots were sold, streets, sidewalks, curbing and trees planted and done in an excellent manner. One nice residence is now completed on the tract, a second well under way a third started and at least the fourth will go up in the near future. Also a water system installed by Mr. Pedder.

Now comes Mr. Bowers with another proposition that promises additional good things for Davis. He owns the land laying to the north of the Bowers Subdivision above referred to and he is carrying forward to completion, arrangements whereby a tract will be thrown on the market in acreage lots, or lots from one acre up each. Mr. Bowers will have put down at once a large well with which he proposes to supply all the water that can possibly be required for purchasers of the acre tracts for irrigation and domestic purposes. This is done with the idea of attracting home builders who desire more land than a lot or two on which to build.

There has long been a demand for just this thing. Some applicants desiring an acre tract with idea of large grounds surrounding the residence, to be improved and beautified with ornamental trees, shrubs, flowers, lawns, etc., while others desire the acre tract for the satisfactory results that can be attained through the planting and caring for a family orchard, berries and garden, in addition to things ornamental, the enjoyment of caring for and having fresh the products from their own garden and orchard.

These acre tracts will be sold with small payment down and terms to suit purchaser, easy monthly payments. An attractive feature of the proposition is the fact that an abundance of water is guaranteed to purchaser at actual cost and Mr. Bowers puts it so that there can be no misunderstanding on that proposition, to-wit, the water user will pay for the juice required for pumping and no more, which is better than owning a plant however small.

Said acreage tracts will be sold under a contract similar to the Bowers subdivision in the matter of building restrictions, and only white people will be sold to. His purpose is to make of this tract a beautiful residence section that will be attractive to the man who

← July 12, 1913

Encouraged by the rapid sell-out of the Addition's lots, Bowers now launches Bowers Acres.

G. H. Hecke, horticultural commissioner for Yolo county, as will be remembered proposed to hold the summer convention of the state horticultural commission of next year, at the University Farm, dropped in one day this week to explain the situation as it has now developed. Mr. Hecke's proposition had been made to the University Farm to hold said convention at the University Farm in June of next year. Dean Van Norman was enthusiastic in the matter and extended the use of the dormitories and dining hall for the occasion. As Mr. Hecke had outlined the plans would include about one week of session and instruction work. Mr. Hecke's plans for the present have come to naught for the following reasons: Dr. Cook, unfortunately, fixed the time for the summer meet for this month and had been scheduled for San Jose. It was apparent to Mr. Hecke at once that it was impractical to hold a successful convention in San Jose during July owing to the fact that the fruit growers are head over heels in the work of gathering and handling of their fruit crop and with no time for conventions. Finally the pressure became so strong from the Santa Clara valley in opposition to the meet in July that Dr. Cook was compelled to abandon the idea of a summer meet as the proper time had passed, as it should have been held in June. Result, San Jose still holds claim on the next meet which will now have to be held probably during the month of December. This cuts out the University Farm in all probability for the reason that Southern California will insist upon holding the meeting following San Jose, and the meet cannot be held at the University during the winter season because the dormitories and dining hall will be occupied by students and will not be available. This all means that the first opportunity for a convention of the state horticultural commission will not form up until 1915 for the University Farm.

Mr. Hecke expresses keen disappointment over the affair. Not only because he is placed in the position of not fulfilling his promises, but it means the loss of one session entirely, and secondly, the session at the University Farm next summer he considers would have been a very profitable one for the horticultural industry of the state. He is also greatly disappointed owing to the fact that he felt so sure of his ground before making the statement that the next summer session would be held here.

they had never seen a nicer lay out for the purpose proposed.

Mr. Bowers says, "You just watch and see what will be done with that tract." And he is a fellow who carries out what he undertakes and declares he already has not only local people, but people in Sacramento becoming interested in the proposition. Really it is splendid to think of a man with a family with the opportunity to purchase an acre of ground at a price no higher than a large portion of the residence fifty foot lots are held at with an abundance of water for asking. The family under these conditions can not only grow a lot for the table but can secure a nice little revenue in addition. There is no reason why all the vegetables, berries and fruits should not be grown to sup-

The board of supervisors met in regular monthly session Monday morning, the minutes of the previous meeting read and approved.

Reclamation district warrants were approved; a map was presented by Hiram Henigan, of Buford and Phenigan orchard lands, and it was approved and the highways dedicated to public use.

The salary of P. P. Lawson, warden of the county hospital, from \$70 to \$85.

The board adjourned to July 8th, at 10 a. m. Immediately upon adjournment the board met as a board of equalization.

H. E. Harrison, county assessor, delivered to the board the assessment rolls, books, maps, etc. The following resolution was adopted:

Be it Resolved, By the Board of Supervisors of Yolo County, sitting as a Board of Equalization, that the following rules be adopted:

In giving notice to any person, firm, or corporation or any proposed raise in their assessment, notice of the intention of this board to increase the assessment of any person, firm or corporation shall be given by the clerk of the board, by depositing in the United States Post-office in this city, a circular letter addressed to the last known place of residence or address of said person, firm or corporation, or president or secretary of said corporation, with the postage prepaid.

Said notice shall contain a direction that the owner of said property shall appear before this board within five days of the time of said notice and show cause why said assessment should not be raised.

It is ordered that the clerk of the board publish a daily notice in the Woodland Daily "Democrat" giving notice to the public that the board of supervisors of Yolo county will be in session from 10 o'clock a. m. until 4 o'clock p. m. on July 11th, 14th, 18th, and 21st, 1913; for the transaction of such business as may properly be brought before said board.

July 8th.

The board met, pursuant to adjournment at 10 a. m. All the members were present.

Applications for liquor licenses were allowed as follows: Manuel Soto and J. H. Caye, Clarksburg; L. V. Nardini, near Washington; Marks and Smith, Freeport; Hoffman and Hoffmann, McClure and Brietze, John G. Soule and Edward L. Hansen of Washington. The petition of Thomas Dreyer to be put on the indigent list for \$8 per month from July 1, 1913, was granted.

The following claims were allowed in Road District No. 2:

J. C. Luft, blacksmith	\$ 31 75
Davis Lumber Co, lumber	27 90
W. L. McVey, labor	100 00
John Maier, cut thistles	52 00
Bill Stone, cut thistles	50 00
E. B. Chandsler and Co., lumber, etc.	130 15
Craig Hyde, sprinkling	99 75

Pac. G. & E. Co., lights, etc.	38 75
Gerald McCoy, roadwork, etc.	80 00
Fenley Mdse. Co., mdse	3 50
C. M. Ray, drayage	2 00
Nelson Thrush, roadwork	2 00
Joe Bird, bridgework	12 00
A. R. Pedder, roadwork	158 00
Parker & Wertner, labor, etc.	8 55
Davis Lumber Co, lumber	1 00

STILL ANOTHER PUMP PLANT

C. A. Covell is Latest To Put in Well For Irrigation.

We have another item of good news this week. The fact that C. A. Covell has completed his big well of which mention prospectively had been made in these columns. He is greatly pleased with it. He stayed on the job personally and watched every auger of dirt that was brought forth. Messrs. Rowe & Wire did the job with one of their power rigs and Mr. Covell says this rig is first class in every particular. He has not had the well tested, but the showing is so satisfactory that he proposes to prosecute the work of preparing ground and installing a pumping plant without delay.

A brief log of the soil and water strata will be of interest to those who may contemplate boring wells for irrigation.

Surface water was struck at 14 1/2 feet; a gravel water streak again at 17 feet, then an eight foot bed of sand at 53 feet, two feet water gravel at the 65 foot level, followed by forty feet of white clay, then twelve feet of sand containing water. The last strata gone through about two feet of tough clay followed by a bed of coarse gravel. Here the boring was stopped and a sand pump operated and a couple of yards of gravel and bowlders brought out. The water flow seemed strong, the water seeking the surface immediately when the sand pump was drawn forth. The total depth of the well is 118 feet. Mr. Covell feels assured he will have an abundant supply for something like a six inch centrifugal, in other words no doubt something like a thousand gallons per minute possibility.

Mr. Covell says he will have J. D. Rowe begin at once the work of leveling and leveeing twenty-five acres for alfalfa and which he hopes to get prepared and seeded by about the first of August and later, likely next spring, add to the alfalfa acreage.

Also in this connection it is pleasing to note that Mr. C. W. Bowers is out with the announcement that he will have a big well put down at once on the northeast corner of his tract

Unlike the six themes and large ads for the Addition, the Acres is promoted with this single, smaller ad that appears week after week in the Enterprise over the next year.

One acre tracts For Sale

There has long been an urgent demand for one acre tracts at Davis, and I have arranged to provide for this class of home builders who desire ground enough for a family orchard, berries, garden truck, together with lawns, etc. Water will be supplied with the cost only of the juice required to run a big pump or about thirty cents per hour.

Small payment down and terms to suit buyer. This beautiful tract adjoins on the north of the Bowers town lot subdivision, and I shall take pride in making of this beautiful "ACRE HOME TRACTS."

HAUSSLER COTTAGE DESTROYED

Dohertys Suffer Loss--- Bulldog Meets Un-timely End.

Fire yesterday afternoon destroyed the residence of Mrs. Geo. Haussler and occupied by Mr. and Mrs. Doherty, instructor in the poultry department at the University Farm. The fire started from the explosion of an oil stove about five o'clock and gained such headway that nothing could be done to check it. The building and contents were entirely burned, the Dohertys not even saving their clothing. The loss probably totals \$2500 and is partially covered by insurance. So rapidly did the flames spread that Mrs. Doherty who was alone at the house, did not have time to rescue the family bulldog, which was fastened in the basement, and the unfortunate animal was cremated.

Captain B. B. Tuttle and wife departed for San Francisco Monday where they will sojourn during the summer months.

FIRE AT CREAMERY BUILDING

The creamery building at the University Farm had a pretty close call Thursday afternoon. Only prompt and efficient fire fighting saved the entire structure from going up in smoke. Just about two o'clock fire was discovered on the tip top of the roof near the east end. The alarm was given. Fortunately the building is equipped with several lines of small hose which were operated from within while a line or two of large hose was carried over the roof from the outside and the roof drenched. The Farm force as soon augmented by

New Acre Sub-Division Will be Extended North Bowers Sells Out Original Thirty- Four Acres.

About four weeks ago Mr. C. W. Bowers put on the market thirty-four one acre tract. It will be remembered he declared through the Enterprise columns that all he asked was a little time within which to make a showing. To use his own expression, "Just wait and we'll show you. There will be something doing on the acreage tracts, as I am determined to develop this tract of land in a way that will surprise the natives." He has surely made good his promise so far as he has gone to date. He has had Rowe and Wire engaged the past four weeks sinking a big well, it being a part of his plan and agreement with purchasers to furnish an abundance of water for irrigation purposes in order that those purchasing acre tracts might grow any manner of crop they chose. Said 12 inch well was sunk 220 feet and there seems assured an abundance of water. A pump was started on the well Wednesday evening and has been running day and night ever since and without effecting the supply of water. The water level goes down to sixteen feet below the pump and there it hangs steadily. Several of the acre tracts have been flooded already. The tract is a scene of lively activity, with the irrigation pump at work, J. D. Rowe with several teams leveling; Smith and Brewster with a couple of gas tractors making levees and streets. Not

the least of all is the factor that Mr. Doyle has under course of construction a nice dwelling. Various crops are being planted or being prepared for. Different varieties of corn, sweet, field and Kafir; Alfalfa and Millet. Mr. Bowers is going to put out some Sorghum to try it out. Also he is considering the proposition of preparing and seeding a small tract to rice as he believes rice will do well.

As above stated, Mr. Bowers placed 34 acre tracts on the market. He tells us the last of them were sold Thursday evening of this week, all of them to good people and quite a number of the purchasers are from other towns, including Sacramento. In this connection Mr. Bowers desires to announce that owing to the fact that all of the 34 acre tract has been sold, he will put more on the market continuing north, as he still has over thirty acres that he is now leveling and preparing in a similar manner. This is an unusual opportunity for those home builders who desire more ground than a town lot, coupled with it the fact that an abundance of water will be supplied them on the basis of their paying for the water at a rate that will barely cover the expense of pumping, combining with the home site, ground and water for alfalfa garden truck, berries, grapes, orchard etc.

G. W. PIERCE GETS SURPRISE

G. W. Pierce was given a big surprise a few days since. As is well known and has oft been noted in these columns, Mr. Pierce has always been an untiring worker for the well being and success of the Davis Almond Growers Association. Always taking an active part and shouldering much of the responsibility in the work that has developed this association into one of the most successful of its kind in the state. Its membership have reaped great benefit from organization, both in purchasing supplies and in disposing of the crops. This is doubly gratifying owing to the fact that Davis body is the parent organization. The system was worked out here originally, G. W. Pierce and J. W. Anderson, being two of the hard working organizers and consistent stayers.

HI WILSON HAS LIVELY TIME

Deputy Constable C. L. Wilson had an interesting time Tuesday evening he reports. Davis Garage filed a complaint in the local justice court asking for a writ of attachment against H. F. Carstens, whom they claimed owed them an account of \$87.45 which

(Continued on last page.)
A number of those of the association who are familiar with the long years of earnest and successful effort in behalf of the organization, prepared a surprise for Mr. Pierce. One of the very best big easy chairs that could be found was purchased and quietly placed in the library of the Pierce new home, when the master of the household was absent. It has ever since been an object of admiration of visitors and Mr. Pierce is very proud of it.

New Garage is Now Ready For Business

Our new Garage, opposite the Enterprise building, will be completed and occupied ready for business in a few days. We will then be open for business with a full line of automobile parts, tires, etc. Meanwhile

We Are Ready to do All Kinds of Automobile and Motor- cycle Repair Work

at the Read Machine Shop next door. We respectfully solicit a share of your patronage and assure you of courteous treatment and prompt attention to your needs in our line.

← August 9, 1913

The 34 lots of the initial Bowers Acres sells out in four weeks, so Bowers extends the development further north.

Editor Scott here describes the tract as a "scene of lively activity" with many people at work. A picture of them taken on August 8th is in exhibit case 5.

work, Harry Stabler of Butte County and others. The board of trade people were very enthusiastic in the success of the fair.

C. W. Bowers of Davis has been requested to look after the matter of live stock exhibit from this section of the county and requests us to announce that undoubtedly there will be gathered together at Woodland for the fair, a splendid collection of live stock and he is particularly interested in horses. Also he desired everybody to understand that they may show their grades and that there will not be any fee for examination as previously announced.

Liberal premiums for the horse and pony show, which is expected to be one of the leading features Yolo county fair and something entirely new in this vicinity, are being offered by the directors. A. H. Brinton has complete charge.

The judging will take place each day, at 8 o'clock in the afternoon, within view of the grandstand.

According to Mr. Brinton, horses entered in the regular breeding classes will be permitted to show in as many of these classes as they are qualified for. Those entered only in the horse show event will not be required to remain on the grounds all the time, but can be used by their owners for transportation to and from the fair grounds.

Owners of horses and ponies can find their classes from the program. Premiums lists and entry blanks can be obtained by addressing H. S. Maddox.

Here is the program for the horse and pony show:

DIVISION M

Saddle and harness classes to be judged within view of grand stand. Each class to be awarded first premium of \$20, second \$10 and third \$5.

A special premium of \$10 each will be given the youngest boy, and the youngest girl competing in the pony classes.

FIRST DAY

Class No. 1—Harness Ponies: Ponies not exceeding 14 hands, to be shown in harness hitched to an appropriate vehicle driven by boys or girls not over 14 years of age. Ponies to count 50 per cent, horse manship 50 per cent.

Class 2—Three gaited Saddle Class:

Class 6—Harness Horses, single: To shown to an appropriate vehicle and judged for manners, conformation, quality, style and all round action. Excessive pace will not be required.

FOURTH DAY

Class No. 7—Harness Horses, pairs: To be shown to appropriate four wheeled vehicle and judged for manners, conformation, quality, style and all round action. Excessive pace will not be required.

Class 8—Fives gaited Saddle Class: To be judged for manner, conformation, quality and gait

saddle purposes. Horses to be shown to an appropriate vehicle, to be then unhitched in the ring, and judged under saddle, at the walk, trot and canter. Horse best adapted to both purposes to receive the award.

THIRD DAY

Class 5—Ladies' Saddle Class: To be judged for manners, conformation quality and gaits. The paces required will be a free open walk, square trot and easy canter.

AN EXCITING EXPERIENCE

Frank Liggett had an exciting experience at an early hour Sunday morning. He related the happening to an Enterprise reporter. He left Davis about half past one o'clock Sunday morning with a party of four civil engineers who had been on the work of the Calhoun proposition in Solano county. He was driving an Overland car belonging to John Bowers and had reached a point about five miles east of Davis and enroute to Sacramento, where a dry slough crosses the road and there is quite a grade with rather a narrow passage. He says he saw a machine bearing down upon him at a rate of speed that startled him and he, to avoid a possible collision swung to the right and as near the edge of the grade as safety would permit. But even this precaution did not suffice, as the oncoming machine came straight into him with a striking power resulting from speed of twenty to twenty-five miles per hour. The owner of the car that hit him proved to be John Allen of Woodland, who was driving a Chalmers car, a pretty heavy machine. Both machines were considerably damaged, but none of the occupants were seriously injured, only shaken up. Allen continued on his way to Woodland and Frank returned to Davis.

Mr. Allen talked of suing for damages, but finally declared he would let the matter drop. Not so with Mr. Bowers; he insisted that he be paid the cost of repairing his machine, claiming that Allen was at fault entirely.

Mr. A. R. Pedder has been busy here the past two or three weeks going over the Bowers subdivision town lots, putting everything in apple pie order. He now has his water system in working order and has laid some lines of pipe. He cut the weeds along the walks and streets and has been giving the long rows of ornamental trees which are planted along all the walks, an abundance of water and they are looking well. He tells us he has sold this week, the last of the lots. He had been reserving five for himself but finally decided to let them go. They went to Maud Tuttle, Grace Hiddleston and George Richardson of Woodland and Abbie Dunfield of Davis.

CHURCH NOTES

Horse and Pony Feature of Long List of Attractive Offered in This

So far as the board of supervisors of Yolo County is concerned, they took official action Tuesday afternoon at fifteen minutes past one that put them on the right road for the advancement of the State Highway project across the Yolo Basin from Sacramento to Davis.

As will be remembered, at the July session of the board, the motion to appoint viewers for this particular proposed road, lost out before the board by a vote of three to two. This did not discourage south and west Yolo however. Petitions were circulated for a brief period. Just long enough to ascertain that the people of Yolo county were practically unanimously in favor of the road across the basin and were perfectly willing that the commissioners choose the route. About 500 signers were secured in as many days with little effort, when a request came to desist and with the intimation that the board would surely reverse the action they had taken at the July meeting, having realized that the doctrine that had been reached to them that nine tenths of the people of Yolo County was opposed to the route chosen by the Highway Commission, was entirely wrong and misleading. Investigation through circulating the petition proved this absolutely, the falacy of the claim the Democrat had been making.

T. G. Schmeiser and W. S. Wright of Davis; Wyatt Bros. and Humphrey of Winters were particularly active in passing round said petition. Only one man in supervisor Stitt's district who had opportunity to sign failed.

The matter came up for consideration of petition for appointing of viewers, Tuesday morninx. Dr. Wyatt of Winters made a ringing speech on behalf of the petition. The writer was unable on account

AFTER CONSTABLE HAINLINE'S SCALP

The petition of J. B. Anderson and others asking for the removal of Constable W. S. Hainline of Davis for neglect of duty, brought about by business affairs outside of the precinct and county, was set for hearing August 11th at 10 o'clock a.m. Constable Hainline was ordered to appear before the board.

To hatch, rear, feed, breed and care for fowls, grow their feed and build poultry yard equipment. To keep farm accounts, so that it may be plain where is the gain and where the loss in different farm operations. To build irrigation equipment. To perform simple surgical operations on farm animals. To care for farm machinery. The farmer who wanted to avail himself of all the opportunities offered would need to come to the short courses every year for three or four years. However, the 293 lectures and 258 practical exercises to be given during the short courses between October 5 and November 14, have this year been planned in

communities, who have left their business for a short time to acquire new ideas. Another advantage is the opportunity of seeing the splendid equipment of the University Farm, the herd of 200 Holstein-Friesians, Jerseys, Guernseys, Ayrshires, Herefords, Shorthorns and Aberdeen Angus; the flocks of Shropshire, Hampshire, Southdown, Cotswold and Merino sheep; the swine—Poland-China, Berkshire, Duroc Jerseys, Tamworth, Chester White and Large Yorkshire; the 363 varieties of grapes, growing in the twenty acres of vineyard; the many acres of orchards, and the unequalled equipment for the studying of irrigation practice and the duty of water. Dry farming methods are illustrated, too. During the two years ending June 30, 1913, the rainfall at the University Farm was only 18.3 inches, yet, without irrigation, the average yield of 63 experimental plats of wheat and 41 plats of barley, was 39 bushels of wheat and 91 bushels of barley.

ANOTHER DAVIS PIONEER ANSWERS FINAL SUMMONS

George Weber Called by Death Last Thursday Morning.

Came To California in 1853 And in 1859 To This Neighborhood, Where He Has Ever Since Resided.

One of the few early settlers of this section answered the summons Thursday morning early, when George Weber gave up this life. Deceased had gradually succumbed to the weight of years, having accounted to his debit, 79 years, 7 months and 7 days. To this was added an attack of Bright's. His demise was not unexpected and all the members of his family had gathered at his bedside. We are indebted to Wm. King, who knew him intimately from the time of his coming to California in 1853 for the following details of his early life in the west. George Weber was born in 1835, family residence, Liverpool, Ohio. He and three brothers, he being the youngest, came to California in 1853. He was 18 years of age. "I first knew him says Mr. King, as a miner that year at Nevada City. In the winter of 53 bought his miner

supplies at the store of the firm of W. P. Womack, now Justice of the Peace at Winters. The two elder brothers returned to Ohio few years later. One of the younger brothers died near Roseville. George came to this section about 1859, his first work for the late Johnathan Sikes. Then came to the old Solano House as stable keeper. With the coming of the C. P. R. he entered the employ of Dreabank in the store he opened; later he opened a saloon on the corner and which he conducted until the town went dry, and owned the property at his death. He leaves four daughters: Mrs. W. J. Montgomery of Sacramento; Mrs. Wm. Grieve the Misses Hattie and Gertie, of Davis. The funeral services will be held at the Catholic church tomorrow morning at 10 o'clock. Interment Davis Catholic cemetery.

CLEAN-UP DAY IN BOWERS ADDITION

It will be remembered Bowers residence tract was laid and well improved, streets graded, concrete sidewalk with black acacia trees planted everywhere. Mr. Pedder kept the tract in good order last year, but the weeds have overgrown a large part of the lots, streets and sidewalks. It would be a shame to neglect this beautiful residence addition. C. W. Bowers requests us to announce next Thursday afternoon as cleanup day at the Bowers addition. He will have two men and a team on the job. Mr. Pedder is here today and declared he would come through with a man and team to work on the streets. Supervisor Russell says he will do his part on the streets providing lot owners do something.

LOCAL ITEMS OF GENERAL INTEREST

The Misses Alma Runge and Elda Eggert of Dixon are visiting Davis friends today. Solano Joint gramamr school at Tremont, will open Monday, August 31st. Miss Iva May Knuppe, teacher. Dr. C. H. Webber has returned from his summer vacation spent at Santa Cruz by the sea, and is looking fresh and happy and is on duty at his dental parlors as of yore. C. W. Bowers tells us his firm will have a nice exhibit at the state fair, but not as extensive as anticipated as the war has prevented shipment of horses from abroad just now. W. P. Watson, an old timer here, stopped off here a little while today. S. Cecil was his guardian and he grew up here. He has been engaged in farming the past 20 years west of Williams, Colusa County. He has a family of two daughters, one residing in Sacramento, the other married and living in Portland, Oregon.

King of State Insurance Agents

Records compiled in the San Francisco offices disclose the fact that J. D. Musgrove of this city "wrote" more grain insurance than any other agent in California. Mr. Musgrove covered over a million dollars of grain insurance during the month of June. All of it Mr. Musgrove advises was written in the Northwestern Mutual of Seattle.—Woodland Democrat.

YOLO WATER CO. SHOWS FILMS

The Yolo County Water and Power company filled the Posey theatre with an interested audience Monday evening. A splendid idea was given of the entire irrigation system, from Clear Lake to the University Farm.

Editor Scott expresses concern over the Addition's upkeep.

We have been talking cleanup in the Bowers sub-division residence tract so much that we anticipate our subscribers will wonder why so much interest on our part. Only this: There was so much done on this tract last year in the way of starting off a splendid residence for Davis that it seems a pity to be permitted to slacken. Messrs. Pedder and Bowers have given the town an addition that is simply great, it seems to us. Mr. Pedder, as the sub-division maker, gave the project a big boost in sidewalks, trees, street grading, and even a water system. The lots were all sold, he tells us, long since, hence the care of the tract has changed from Pedder to the individual lot owners. However, Mr. Pedder still takes an interest, although owning as we understand it but one lot, and on which he erected a bungalow and water works plant. In this connection a word on another feature of the situation. There had been complaint of the quality of the water sent through the Pedder pipes. Mr. Pedder in an interview with the Enterprise editor this week said that he had made a careful investigation and located the cause of the unpleasant flavor of the water, to-wit: the pump oiling apparatus was out of order and the oil and oil waste contaminate the water. Also the tank needed cleaning. He says everything has been put in perfect order now and hereafter the tank will be cleaned often. Also by the way he states, he had the water analyzed and it tasted splendidly. Mr. Pedder also tells us he will lay a four inch main along Fifth street between the old town and the addition. The two inch main now down he will take up and use for laterals. The number of home builders in the tract makes this necessary in order to supply an abundance of water.

WHY NOT AT DAVIS, TOO?

done at one sitting.—Oakdale Graphic.

BYRN'S GRILL & RESTAURANT.

Will be open to the public at all hours. Everything new, neat and clean. Well ventilated and spacious dining room. Board by the day, week or month. Rates by the week or month.
